

Food & Fiber Production and Marketing

- Animal Health and Welfare
- Food and Fiber Supply Chain
- Food Bioengineering, Processing and Safety
- Genetic Enhancement in Crop and Livestock Systems

Water Use and Conservation

- Alternative Crops for Water Limited Systems
- Sustainable Management of Water Resources
- Water Quality and Availability

Family Development and Health of New Mexicans

- Agricultural Literacy and Education
- Increasing Economic Opportunities in New Mexico
- Pathways to Human Health and Wellbeing

Environmental Stewardship

- Carbon, Food, Energy, and Water Systems (CFEWS)
- Ecosystem Structure and Function in a Changing World
Includes: Biodiversity and populations management and restoration
- Climate Adaptation and Resilience
Includes: Sustainable Natural and Built Environments
- Land Use and Environmental Function
Includes: Ecosystem Services

Project Investigator / Capacity Project

All projects should include outreach activity and communication of research impacts.

BE BOLD. Shape the Future.
